

New York Inkjet®

The Office Supply Store

April 29, 2009

Dear Valued Customer:

According to the Centers for Disease Control and Prevention (CDC), human cases of swine influenza A (H1N1) virus infection have been identified in the United States. Human cases of swine influenza A (H1N1) virus infection have also been identified internationally. The following are some CDC tips for limiting your risk of catching the swine flu virus:

- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- Wash your hands often with soap and water, especially after you cough or sneeze. Alcohol-based hand cleaners are also effective.
- Avoid touching your eyes, nose or mouth. Germs spread that way.
- If you get sick, stay home from work or school and limit contact with others to keep from infecting them.

The New York Inkjet team wants to make you aware that we have a portfolio of products available that support some of the CDC recommendations on how to prevent the spread of the swine flu virus. We are bringing in additional stock and watching our inventory levels on the following products, if you need of any of these products please feel free to email or call us and we will have these shipped to you right away.
